

Optilux Window Film SA Matte

Optilux Window Film SA Matte is a single-side, matte-coated polyester film designed for use with solvent inks. This 5 mil front-print film is water resistant and has the superior dimensional stability and lay-flat properties typical of graphic arts quality polyester substrates. Optilux Window Film SA Matte is compatible with eco- and volatile-solvent inks and gives firm adhesion to any window or smooth surface, while allowing multiple repositionings. Optilux Window Film SA Matte is a good choice for store window displays, deli counters, and light boxes.

Condition of use and stocking

Unopened media can be stored flat or on end. Avoid extremely hot or cold storage temperatures. Allow media to adjust to room temperature before printing. Print in controlled environment, 35% to 65% relative humidity and 50° to 86° F (10° to 30° C).

Store unused material in its original packaging (box and plastic sleeve, using the end plugs to secure the sleeve into the core). Doing so ensures proper identification of media when it is next used. It also prevents damage to roll ends and pressure bands on the underside of the roll if it is stored flat.

	Size	Catalog #
Optilux Window Film SA Matte 235	36" x 65'	5136
	50" x 65'	5150
