

# Mounting & Laminating → Heat Set Laminating Films

## Duraguard Lustre

Duraguard Lustre is a heat-set laminating film that provides a semi-gloss finish which enhances color saturation and contrast.

### Uses

Well suited for high-ink-coverage prints on photo-glossy paper, Duraguard Lustre delivers a high-quality, color-rich end product. It's perfect for textured images and for mounting multiple images to a single board. It allows images to be flush-trimmed or die-cut — and rolled almost immediately after processing — without fear of delamination.

### The QMLS difference

When you choose QMLS, you get the convenience of three fully-stocked distribution centers in Connecticut, Chicago, and Florida — allowing for same-day shipping and next-day delivery on most orders. Plus a follow-up call for every order, telling you when your products shipped, by what method, and when you can expect delivery. If your products are ever backordered, we give you the option of choosing an alternative at no additional cost to you.

Size	Catalog #
31" x 164'	0440120
38" x 328'	0440138
41" x 328'	0440140
43" x 328'	0440145
51" x 328'	0440160
55" x 328'	0440150

Specifications	
<i>Finish</i>	Semi-gloss
<i>Base Film/ Filmic Carrier</i>	2.0 mil (50 micron) PVC (vinyl)
<i>Adhesive Bond</i>	1.0 mil (25 micron) solvent acrylic
<i>Release Liner</i>	Moisture stable paper
<i>Initial Tack</i>	Low
<i>Application Temperature</i>	170° to 210°F (77° to 99°C)
<i>Application Speed</i>	1' to 6' (0.3m to 1.75m) per minute
<i>Notes</i>	To keep film from stretching as it becomes soft and pliable when heated, apply only minimal brake tension to unwind supply shaft and release liner take-up.  Adjust take-up shaft in such a way that release liner is removed just prior to entering nip rollers. By reducing adhesive's exposure to air, there is less chance of picking up dust particles.

### Ordering

Duraguard Lustre is stocked in all QMLS distribution centers and available for immediate delivery. [Click here](#) to order online, or call 1-800-552-9427.
