

PosterColor Photo Paper

PosterColor Photo Paper is an economical matte paper offering excellent image quality for indoor applications.

Uses:

Main uses include posters, photo reproductions and POP and tradeshow applications.

Advantages:

PosterColor Photo Paper Matte has a barrier coating to prevent cockling from too much ink saturation, which occurs on other bond type papers. It works with inexpensive thermal laminates in addition to pressure sensitive laminates.

Printing Tips: Always use gloves when handling rolls. Always print on the outside of roll. To insure best print performance of this media, clean and calibrate cartridges before loading the paper. While loading the HP 5000/5500/6100 printer, only feed 6" of paper beyond print heads. This will prevent alignment errors and banding. This media is designed to accept up to 300% ink load. Increased ink loads will increase dry time. For best results, print in 60° to 85° and 40% to 60% RH.
